## TRUCONNECT<sup>®</sup> Remote Services **REMOTE MONITORING AND REPORTING**

# THE FUTURE OF MAINTENANCE IS HERE TODAY

**TRUCONNECT® Remote Monitoring and Reporting provides you with actual usage data that enables you to optimize maintenance activities and give visibility to maintenance and application compliance. The data gives you confidence to plan your actions and make informed decisions regarding maintenance investments and productivity.**

## **TRUCONNECT® Remote Monitoring and Reporting**

Remote Monitoring and Reporting makes the real usage of your equipment available through a remote connection. We provide you with data that can help you increase the safety of your equipment usage, optimize your maintenance spending, and plan your equipment modernization needs with greater confidence based on actual usage information.

With Remote Monitoring and Reporting you can also optimize your equipment usage by identifying where operator training could improve the safety and productivity of your worksite.

A variety of operating data regarding actual equipment usage is compiled periodically at the Konecranes Remote Data Center. Easy-to-interpret graphical reports can be brought to you on demand or emailed on a predetermined schedule, including information about:

- **Safety**  
(e.g. Overloads, E-Stops, Hoist Over Temperatures)
- **Operating Statistics**  
(e.g. Hoist Motor Starts, Work Cycles, Running Hours)
- **Service Life**  
(e.g. Hoist Brake, Hoist Machinery, Hoist Structure).

## **TRUCONNECT® Remote Monitoring and Reporting with Safety Alerts**

Where Remote Monitoring and Reporting is in place, a focused selection of safety related data (e.g. Overloads, Overheats) can be transmitted by email and/or SMS soon after the event occurs so that you can take prompt action as necessary.

## PLAN FUTURE ACTIONS WITH BETTER INFORMATION

### TRUCONNECT® Remote Monitoring and Reporting

- Receive better information about the safety, operating statistics and service life of your equipment. This data helps you to make better decisions and increase your productivity
- You are provided with online access to periodic equipment usage reports on demand or emailed on a predetermined schedule
- Add Safety Alerts to the standard reporting and get a focused selection of safety related data soon after the event occurs
