

INDUSTRIAL CRANES

Quality at the core

We stand behind our cranes

We offer an extensive selection of industrial lifting equipment using the latest technology, all supported by a comprehensive service offering.

From the moment we begin the design process, every product we make represents quality. Each core component is engineered specially for lifting, with safety our highest

priority and improved productivity the ultimate goal. Strict quality control, maintained by extensive testing throughout every phase of production, means we can vouch for our products and proudly stand behind them.

With Konecranes, you make a long-term investment that will continue to give you good returns for many years to come.

We understand your production

With know-how in everything from light lifting to process cranes and more than 80 years of experience working in close cooperation with our customers, we are committed to providing you with lifting equipment and service that increases the safety, productivity and sustainability of your business.

We have worked closely with customers across many different industries around the globe giving us the knowledge to help you choose the right equipment for your application. We understand that there is no “one size fits all” when it comes to lifting.

Comprehensive and systematic asset management

Konecranes Service provides industry-leading lifecycle services for all types and makes of industrial cranes and hoists. We have the largest and most extensive service network in the industry giving you the advantage of local inspectors and technicians with access to a wealth of knowledge gained from servicing hundreds of thousands of assets in a wide range of industries.

At Konecranes we take a comprehensive and systematic approach to managing customer assets throughout our Lifecycle Services. We don’t just drop off a report on the way out, we consult with you to help guide your decision making. We share our findings, provide recommendations based on our industry-leading expertise and discuss how each action impacts your operations and the entire health of your business.

CORE OF LIFTING

We design our products so that each component is integrated to work in unison, as part of a whole. That means we don't just design every component, but the interaction between them as well. Like the pieces of a jigsaw puzzle that fit together perfectly to create a beautiful picture, our core components, gears, motors and controls work together seamlessly to create outstanding lifting machines.

Workstation lifting systems

At any workstation, lifting equipment needs to be easy to reach and easy to use. It also needs to adapt smoothly to changing processes and operating environments. In our range of light lifting products you can find the right equipment for every workstation, whether you need to lift demanding loads or make high-precision movements.

ELECTRIC CHAIN HOIST

An ergonomic and efficient lifting partner to support your everyday applications and processes up to 5,000 kg. It's tough, precise, reliable and designed for more than a million operations.

AIRBALANCER

For assembling, packing and maneuvering loads up to 350 kg by hand. Loads feel almost weightless as load weight compensation provides you with accurate positioning and safer and easier lifting in fast pick and place operations.

BELT HOIST

The right choice for electronic, pharmaceutical and food industry applications – anywhere your workspace must be properly clean and hygienic and you need a lifting capacity of up to 2,000 kg.

MANUAL PRODUCTS

These hoists and trolleys are an excellent choice for any environment, even heavy-duty operations, where electricity is impractical or not available. Able to handle loads of up to 20,000 kg, they are especially suitable for construction, maintenance and service work.

ALUMINUM WORKSTATION CRANE

Handles loads of up to 2,000 kg across a wide variety of profile types, and is a cost-efficient, safe and ergonomic solution for your work area. The anodized aluminum surface makes the crane resistant to dusty or corrosive environments.

STEEL WORKSTATION CRANE

Can lift up to 2,000 kg with profiles that allow long suspension distances and long span lengths for extra adaptability. A maximized working area below the crane increases productivity and simplifies operation.

JIB CRANE

A cost-efficient solution for handling materials up to 2,000 kg. Standard wall-mounted jib cranes can rotate up to 270°, and pillar jibs can move through 300°. Highly adaptable, with several mounting options, they fit well with many workshops and industries.

Overhead cranes

From high-quality basic equipment to the most advanced and specialized lifting technology available, our range of overhead cranes cover almost every lifting application. But if our turnkey solutions are not suitable for you, we can customize our cranes to fit your specific needs.

ELECTRIC CHAIN HOIST CRANE

Chain hoist cranes have a lifting capacity of up to 5 tons, with compact dimensions and easy service access. These overhead cranes bring you a cost-effective lifting solution for many different industries and lifting applications.

WIRE ROPE HOIST CRANE

The CXT crane is the industry leader in medium-heavy indoor cranes. It gives you lifting capacity of up to 80 tons and a wide variety of features that help it adapt to nearly any industrial setting.

SYNTHETIC ROPE HOIST CRANE

The S-series crane has a redesigned hoist structure with synthetic rope and Smart Features for an innovative approach to lifting up to 20 tons. With high usability, it increases your productivity and safety and requires less maintenance.

WALL CONSOLE CRANE

With a capacity of up to 10 tons, wall console cranes are ideal for transporting materials to individual workspaces, and often handle components inside assembly compartments. Its compact size allows movement around assembly lines, warehouses, or other industrial areas with limited room. When operated below overhead cranes, they can facilitate the material flow in production areas.

SUSTAINABILITY AT EVERY STAGE OF A CRANE'S LIFECYCLE

Konecranes is committed to providing sustainable solutions and services while preventing and minimizing emissions and waste. Lifecycle thinking combined with usability, eco-efficiency and safety guide us in our product design. Our aim is to maximize the lifecycle value of our products.

Open winch cranes

Our open winch cranes can cope with the challenge of your most demanding processes, yet also offer you the precision required for assembly and maintenance tasks. Flexible enough for almost any industrial setting, they combine the latest in advanced design with hard-working electronics and sharp computer intelligence for total control over your material handling.

GANTRY CRANE

A gantry crane can be installed in all kinds of buildings and work areas, both indoors and outdoors, for lifting up to 12.5 tons. A specially designed steel structure and a compact hoist provide plenty of space to work around the crane. With a comprehensive set of control and safety features, and options for specific industrial lifting applications, gantry cranes are built for safety and maximum usability.

PROCESS DUTY WINCH CRANE

The M-series open winch crane is an extremely compact winch that can fit a wide variety of applications with a lifting capacity of 140 tons on dual trolleys. Its modular design makes it easy to adjust the crane's size for your work space or more demanding processes.

ASSEMBLY DUTY WINCH CRANE

The SMARTON open winch crane has a lifting capacity of up to 250 tons with a single hoisting trolley. Its compact size and highly tuned software make it the right choice for the precision required in assembly and maintenance applications. Small approach dimensions help you better utilize your factory layout.

CUSTOM CRANES

With lifting capacities of up to several hundred tons, our custom cranes can be optimized to your demanding applications. Custom cranes can also be adapted to fit your environmental and process requirements.

Konecranes is a world-leading group of Lifting Businesses, serving a broad range of customers, including manufacturing and process industries, shipyards, ports and terminals. Konecranes provides productivity enhancing lifting solutions as well as services for lifting equipment of all makes. In 2022, Group sales totaled EUR 3.4 billion. The Group has approximately 16,500 employees in around 50 countries. Konecranes shares are listed on the Nasdaq Helsinki (symbol: KCR).
