CONTROL SYSTEM UPDATE FOR ENSURED PERFORMANCE.

INSIDE

Control System Update
MDL2 to MD4

CONTROL SYSTEM UPDATE FROM MDL2 TO MD4.

EXTEND YOUR KONECRANES LIFT TRUCK LIFETIME.

The MDL2 electronic control unit has become obsolete and is no longer supplied. Repairing electronic control units is difficult, time wasting and not 100% reliable. Ensuring a safe and reliable Electronic Management System by updating to the new MD4 module is therefore strongly advisable.

HOW THE SYSTEM UPDATE WORKS.

Konecranes has developed a solution to replace old MDL2 control units with a modern MD4 module. MD4 is state of the art when it comes to Lift Truck Control Systems. This is the same hardware currently being equipped in all factory-new Konecranes Lift Trucks.

BENEFITS.

- Modern Control System
- Control System Parts available
- New software

WHAT'S IN THE PACKAGE?

- Master Display IQAN-MD4
- Expansion Control unit IQAN
- Wiring Harness for easy adapting
