

YARDPC RETROFIT PACK

As technology advances so must we!

Because the previous YardPC model has become obsolete, replacement units are no longer available.

However, there is a solution:

A new retrofit pack that works with all previous models.

Pack part number: 67832989

In the absence of direct replacement unit, this retrofit set consists of several components which are presented in the table and photograph below.

SOME POINTS

- YardPC is a critical component
- Breakdown will stop the crane
- All items are in Konecranes stock and can usually be shipped within a week
- No need to replace existing working units

If you have any questions or should you encounter difficulties, please contact us.

Contact your nearest
Konecranes Ports Services branch.
