# KONECRANES ENGINE SHUTDOWN SOFTWARE UPGRADE SOLUTION

## ENABLE THE ENGINE SHUTDOWN EXTRA FUNCTION AND LET THE CONTROL SYSTEM ACT ON THE ENGINE TEMPERATURE AND OIL PRESSURE.

The Konecranes engine shutdown software upgrade solution notifies the operator through a pop-up message on the MD4's display when the engine temperature is too high, or the engine oil pressure is too low, giving the operator the possibility to select between turning off the engine or keep it running.

## HOW KONECRANES ENGINE SHUTDOWN SOFTWARE UPGRADE SOLUTION WORKS.

The operator will get a display notification if:

- Coolant temperature exceeds 103°C
- Oil pressure is below 1 bar
- Faulty sensor on engine is identified.

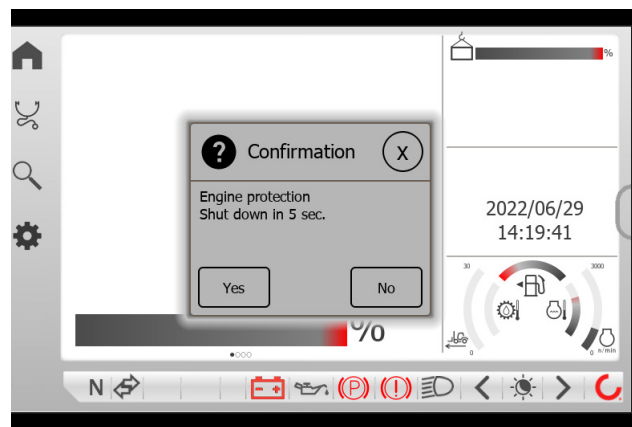

Through the pop-up window, the operator can select between turning off the engine or keep it running.

## BENEFITS.

- Decrease machine downtime
- Increase productivity
- Increase engine lifetime
- Minimize downtime costs

## WHAT'S IN THE PACKAGE.

Software upgrade

## CONTACT.

### UPGRADE YOUR EQUIPMENT TODAY.

Konecranes engine shutdown can be fitted on all Konecranes forklifts and empty container handlers equipped with MD4 master display. Enable this extra function and let your control system acts on the engine temperature and engine oil pressure. Upgrade today.
