

SAFETY UPGRADE PACKAGES

VISUAL WARNING FOR YARD STAFF.

INSIDE

**Blue Point
Awareness**

KONECRANES BLUE POINT AWARENESS.

AVOID COLLISIONS IN NOISY WORKPLACES.

In busy and noisy situations, it's not always easy to spot a moving lift truck in time. The Blue Point Awareness system enhances safety by creating an extraordinarily bright spot on the ground a few meters ahead of or behind the lift truck, warning coworkers and other persons nearby that a lift truck is approaching. The visual warning is a simple but effective safety upgrade in environments where visibility is low and many people wear ear protection. Retrofit your lift trucks today to prevent collisions that may result in human injuries and unnecessary downtime.

HOW THE AWARENESS SYSTEM WORKS.

The Blue Point Awareness system is installed at a 45 degree angle, in order to create a bright blue spot on the ground, ahead of or behind the lift truck. Each unit is equipped with an energy efficient, long life LED light that is powered by the lift trucks engine, and available in different voltages. The automatic system fits all Konecranes lift trucks, and can be mounted in a rear and/or front position.

BENEFITS.

- IP 69K-rated for maximum resistance to dust, heat and high pressure water
- EMC-tested for electrical safety

- Designed to withstand vibrations
- Saltspray-tested for rust resistance
- UL-approved
- Housed in tough aluminium casing

WHAT'S IN THE PACKAGE.

The standard kit contains:

- 1 Blue Point lamp
- Installation kit
- Mounting instructions

CONTACT.
