KONECRANES GRID CABIN PROTECTION UPGRADE SOLUTION

PROTECT YOUR DRIVERS FROM DEMANDING ENVIRONMENTS.

The Konecranes grid cabin protection upgrade solution shields the operator from hard-to-see obstructions and falling objects, providing a safer working environment.

Lift trucks frequently operate in busy areas in which accidents can easily occur. If undesired objects fall onto the truck because they are bumped or dropped, when they hit an unprotected cabin, the result can be very serious. Our solution has been studied and developed for all Konecranes forklifts, empty and laden container handlers.

HOW KONECRANES GRID CABIN PROTECTION UPGRADE SOLUTION WORKS.

Starting with the front and roof windshields, grids can protect the driver if a falling object hits the cabin and breaks the glass. Front and roof windshield grids can be used in combination, or separately, depending on individual requirements. A grid for the condenser on the back of the cabin is also available.

BENEFITS.

- Increase safety
- Quick and easy installation
- Compact design

WHAT'S IN THE PACKAGE.

Protection grille
Bracket and mounting accessories
