Auxiliary Control**

CABIN MOVEMENT AUXILIARY CONTROL.

ENHANCE YOUR KONECRANES REACH STACKER CABIN MOVEMENT FUNCTION.

Get the possibility to control movement of your sliding cabin from outside. This option will support in specific maintenance, repair operations and might be of use in case of emergency.

HOW THE CABIN MOVEMENT AUXILIARY CONTROL WORKS.

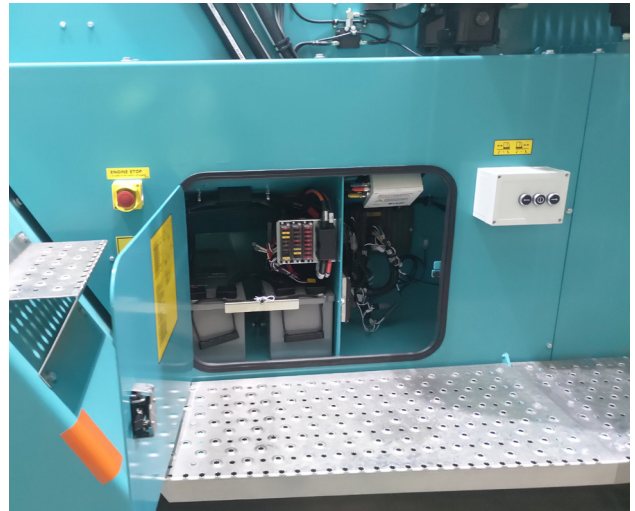

In addition to the existing control in the cabin, an extra one can be installed on your Konecranes reach stacker chassis, accessible for ground staff. In this way, the cabin sliding function can be commanded from this additional control panel.

BENEFITS.

- More flexible maintenance and repair operations.
- Additional control option in case of emergency.
