

Equivalent parts

Affordable parts with Konecranes warranty

As an alternative to OEM parts, Equivalent Parts are functionally similar replacements designed and manufactured by Konecranes or sourced from suppliers other than the original manufacturer. They are competitively priced and backed by a Konecranes warranty. Equivalent parts are either reverse-engineered parts or universal commercial parts.

Reverse-engineered parts

These parts are tested and/or designed specifically to replace certain OEM parts. Reverse engineering allows for enhancements to the material, design or manufacturing process to improve performance and increase lifespan of the part.

Konecranes quality specialists inspect and test the manufactured part and make sure it is compatible with the equipment it is intended for.

Common reverse engineered parts include:

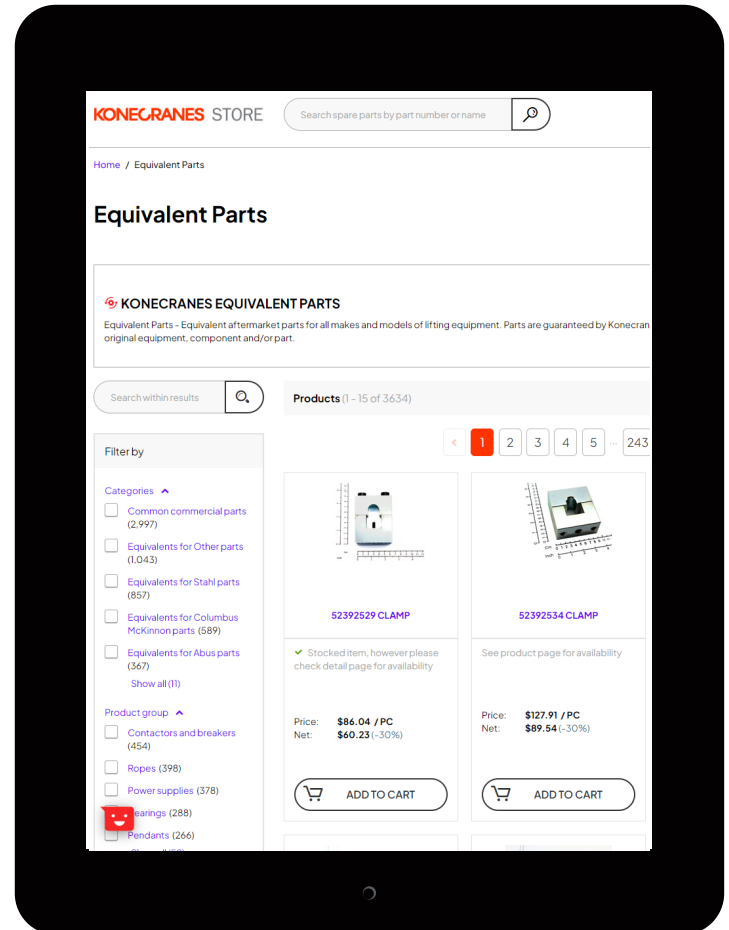

- Rope guides
- Ropes
- Rope sheaves
- Travel wheels
- Hook blocks

Universal commercial parts

We identify and source commercial parts from our own supplier network for all cranes we service.

Common commercial parts include:

- Electrics such as contactors, fuses, plugs, pendants and cables
- Bearings
- Push buttons
- Buffers
