

Rope guide

Universal cost-effective rope guide

The Konecranes rope guide is a high-quality, low-cost replacement for almost any brand of rope guide, whether Konecranes or other make, on small and mid-sized wire rope hoists. The universal design makes it quick to install on a range of drum diameters, giving you high-value performance.

Durability even for more demanding applications

The rope guide is lightweight and durable, and installs quickly and easily, with no special tools required. It's exceptionally rigid and can withstand extreme applications and environments.

New design for improved reliability

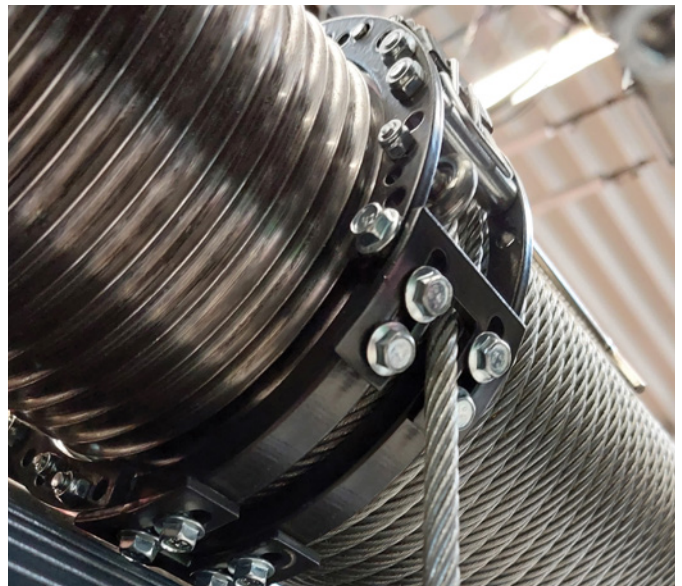

The redesigned rope guide features even sturdier torque arms to secure the rope guide in place. It also includes an improved spring set with a stronger spring to help prevent slack rope situations.

Additionally, the roller wheels facilitate smooth transition movement, which can help extend the service life by minimizing wear on both the rope drum and the guide itself.

Take advantage of this versatile solution

The rope guide can be made to suit a wide range of drum sizes and any drum pitch direction. And its modular design allows for the installation of devices for new features, such as drum cleaning, side-pull prevention and rope measuring.

The Konecranes rope guide can be configured to fit different hoist applications and construction and is fully interchangeable with your existing rope guide.

Benefits

- Fast and easy installation without special tools for minimum downtime.
- Exceptionally rigid, able to withstand extreme applications and environments.
- The universal design is suitable for rope diameters from 5mm to 48mm.
- Roller wheels provide smooth movement, which can extend service life by reducing wear on the rope drum and the guide itself.
- Easily add devices for new features such as side-pull prevention thanks to the modular design.
