# REAL-TIME MATERIALS MANAGEMENT INFORMATION WITH YOU ANYTIME, ANYWHERE

**Agilon® Mobile helps you to manage material and information flows with an easy-to-use web portal optimized for mobile devices. It has the features you need to speed up your daily materials management routines – for example, check item availability and perform transactions.**

## CHALLENGE

Warehouses and materials are not always close to you. An inaccurate inventory means that you might have to spend your valuable time searching for materials you need from several locations.

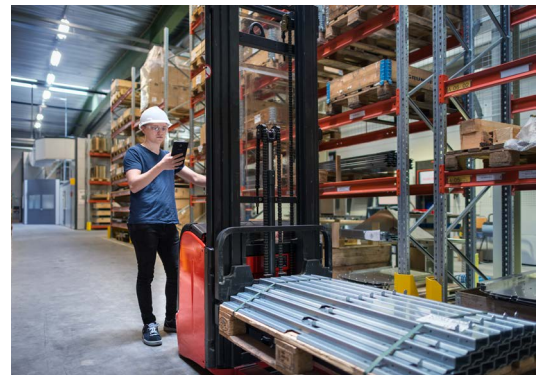

## SOLUTIONS

Agilon Mobile connects you to information about the contents of your warehouse, wherever you may be. Agilon Mobile is an easy and fast way to:

- Connect your personnel to materials management information and create a streamlined material flow
- Connect various locations and external warehouses to the Agilon system
- Gather transaction and usage data from consumables and materials in external warehouses
- Monitor and manage electronic picking lists
- Monitor open orders and confirm when ordered items have been received

Agilon Mobile can also be used as a stand-alone solution for managing warehouse transactions and materials.

You can manage any material outside Agilon with a mobile device.

## BENEFITS

- Save time – no need for separate confirmation in ERP system
- Have real-time visibility of your entire warehouse
- Manage all your materials in the same system
- Use with a cell phone, tablet or PDA device

**ARE YOU INTERESTED IN HOW AGILON COULD LIFT YOUR BUSINESS?**
